With innate curiosity and a decade of experience studying and teaching applied logic, I am a professional problem solver eager to join an agile and innovation-driven development team on a mission to help both people and the world (wide-web). A fast and avid learner, I quickly grasp new concepts and technologies and creatively use them to design efficient, reliable, and user-focussed software

Tech Stack

+Frontend: Javascript, React, TailwindCSS, Axios, Framer Motion
+Backend: Nodejs, Express
+Database: PostgreSQL, MongoDB, Supabase
+Testing: Jest, React Testing
+Misc: Git, GitHub, Astro

Experience

INDEPENDENT - Freelance Developer

June 2023 - Present

- LittleCraftsLondon.com
 - Assisted migrating to SQL database
 - Added pop-up modals for site info / discounts
 - Implemented reviews section
 - Managing live inventory
 - Adding admin login for client to update discounts / announcements

NORTHCODERS - Junior Developer

Feb 2023 - May 2023

- Achieved many milestones such as building out API's from scratch
- Stored SQL data in ElephantSQL database
- Frontend Projects built using Reactjs which integrated with Node/Express backend server alongside the SQL database
- Gained industry-led experience in full-stack web development
- Adopted sector-wide good practices such as pair programming, TDD (Jest), and Scrum
- Projects:
 - NC games - [REST API server \(backend\)](#)
 - NC games - [client \(frontend\)](#)
 - BlockList - [mobile app made with Flutter, Supabase, Typescript](#)

- Provided remote IT support and managed a wide range of systems, including Windows and Mac machines, and oversaw server, firewall, hardware, and software maintenance
- Completed CompTIA+ industry standard certificates
- JAMF integration for larger organizations and schools, central management systems for Mac focused clients (MDM solutions)
- Oversaw all Mac machines at John Lewis
 - Major infrastructure updates during Covid
 - VPN setup company wide
 - MDM solutions also integrated for managed firmware updates, tracking
- Virgin Gyms - Remote management and permissions for iPads used at gyms for signups

Projects

Windows 98 Style Portfolio [React, REST API, useHooks, TailwindCSS, Axios]

- Personal portfolio website with a nostalgic Win98 feel. Just a fun project
 - [GitHub](#)
 - [Live Preview](#)

NFT Tracker [React, REST API, Axios, TailwindCSS]

- Tracker fetching current prices, volume, market cap, fully dynamic by certain time frames and currencies
- React Router, Framer Motion, Line Awesome icons
 - [GitHub](#)
 - [Live Preview](#)

Wild Oasis Cabins [React, Styled Components, Supabase] **currently working on this site**

- Full-stack app with dashboard for authorized workers to use to manage cabin bookings
- React Router, Context for global management, React Query, Higher Order Components, Compound Component Patterns
 - [GitHub](#)
 - [Live Preview](#)

AI Face Recognition [React, Axios, Express, Node, PostgreSQL]

- Using Clarifi API for face detection, will add a outline matching any faces within uploaded image
- Full stack app with custom made API, storing all info in PostgreSQL
 - [GitHub frontend](#) (React)
 - [GitHub backend](#) (Node/Express)
 - [Live Preview](#) - *May take a few moments to login (free database)

Pizza Shop [React, REST API, TailwindCSS]

- Personal portfolio website with a nostalgic Win98 feel. Just a fun project
 - [GitHub](#)
 - [Live Preview](#)
